

Build America, Buy America (BABA) Act for Valve Compliance

Red Valve, your trusted source for quality valves, is committed to delivering products that comply with the Build America, Buy America (BABA) Act. Our valves can be specified to meet H.R. 3684, Infrastructure Investment and Jobs Act, for projects involving Clean Water State Revolving Funds (CWSRF) or Drinking Water State Revolving Funds (DWSRF). This requirement applies to projects for the construction, alteration, maintenance, or repair of a public water system or treatment works.

Red Valve has close relationships with a network of US-based vendors throughout our supply chain that provide BABA compliant castings and components. Red Valve products available to meet BABA requirements include:

- Air Operated Pinch Valves
- Manual Pinch Valves
- Control Pinch Valves
- Knife Gate Valves
- Pressure Sensors
- Redflex Expansion Joints
- Tideflex[®] Products

Specify BABA as a modifier on quotations and on orders to ensure BABA compliance is maintained throughout the manufacturing process. When BABA valve products are ordered, Red Valve will provide a certification letter that meets EPA documentation requirements.

Red Valve is able to produce and supply BABA compliant valves from their manufacturing plant located in Gastonia, North Carolina.

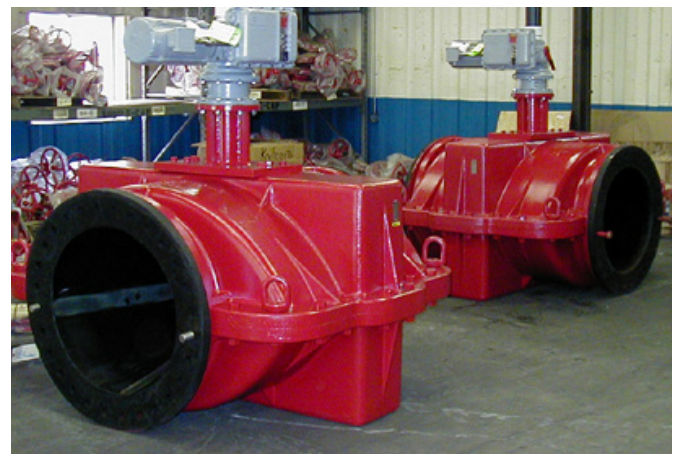

On November 15, 2021, the President signed the Infrastructure Investment and Jobs Act (IIJA), commonly referred to as the Bipartisan Infrastructure Law (BIL), which includes BABA. The BABA Act applies to all federally funded infrastructure projects.

For details see the briefing room statement and release and guidebook from The White House: [Fact Sheet: The Bipartisan Infrastructure Deal](#) and [Guidebook to the Bipartisan Infrastructure Law](#).
